The Profile NT filing cabinet provides professional storage and protects your vital documents from fire

Profile NT

FIRE RESISTANT DOCUMENT PROTECTION

Key features

- High-quality filing cabinet for professional storage of important documents.

- Profile NT 60 and NT 120 models provide fire protection for one hour and two hours respectively.

- Both models are tested and certified in accordance with the most common and well-established standard in Europe, NT Fire 017.

- NT 60 and NT 120 are available as a 31" cabinet with 2, 3 or 4 drawers, and the NT 60 is also available as a 22" cabinet with 2 or 4 drawers.

- Painted in a light grey colour, electrostatically powder-coated with a glossy finish. Blends nicely into any office environment. Easy to position with small external dimensions in relation to capacity.

- Lighter weight construction compared to other cabinets on the market, which means smoother transportation and installation.

- The total internal height is 291mm, suitable for any file size available on the world market.

- Steel inner lining in each drawer to protect the contents from insulation dust.

- Steel dividing plates between each drawer to avoid unauthorised individuals getting access to anything in a locked drawer via an open drawer.

- High-quality steel sliders in all cabinets to ensure smooth operation and full drawer access.

- All cabinets fitted with high security locks as standard.

- The handles with integrated card-holders provide a system for labelling each drawer for easy location of stored documents.

- Profile NT is manufactured in accordance with the ISO 9001 quality management system and the ISO 14001 eco-management system.

31" – 4 Dr	1408	544	776	291	387	619	230	287	278

Lock Options

Combination lock

Key lock

All Profile NT cabinets are fitted with high security locks as standard. They can be equipped with a central key lock for single locking or together with a mechanical combination lock for dual central locking. In addition each individual drawer can be fitted with a key lock. If required it is also possible to operate more than one cabinet with the same key.

Fire Testing

Profile NT protects all paper documents against fire. The cabinets are tested and certified according to the most common and well-established standard in Europe – NT Fire 017. The Profile NT 120 can withstand a fire for two hours, and the Profile NT 60 for a total of one hour.

Test Procedure

Stage 1
The cabinet is placed in a furnace and heated to a temperature of 1090°C for 60/120 minutes to simulate an extremely severe fire.

Stage 2
The cabinet is taken out of the furnace after 60/120 minutes and cooled down with water. When the cabinet is opened the maximum inner temperature must not exceed 150°C.
Internal Fittings

Each 31" drawer has additional suspension bars as a standard feature, which can be easily mounted to reduce the width to suit A4 files.
